

# Achieve Real Results Faster in the Cloud

Deploying in the JDA Cloud is the fastest – and easiest – way to make sure you’re getting the most value out of your JDA solutions.

## TOP 3 ADVANTAGES OF DEPLOYING IN THE JDA CLOUD:

**#1**

### Increases Speed and Agility

- ◆ Get ready for implementation **up to 20% faster** and increase supply chain agility using JDA Cloud and Professional Services
- ◆ Operate your business at peak performance, all the time, with deployments provided by JDA Cloud experts
- ◆ Deploy upgrades faster in a stable and secure environment managed by JDA Cloud experts

**#2**

### Reduces Total Cost of Ownership

- ◆ Reduce in-house labor costs to stage, patch, upgrade and test, plus hidden costs of hiring, training and attrition
- ◆ Minimize internal real estate and IT infrastructure costs for servers, hardware, in-house systems, security, power and cooling
- ◆ Reinvest cost savings and free up workforce to focus on core, strategic initiatives

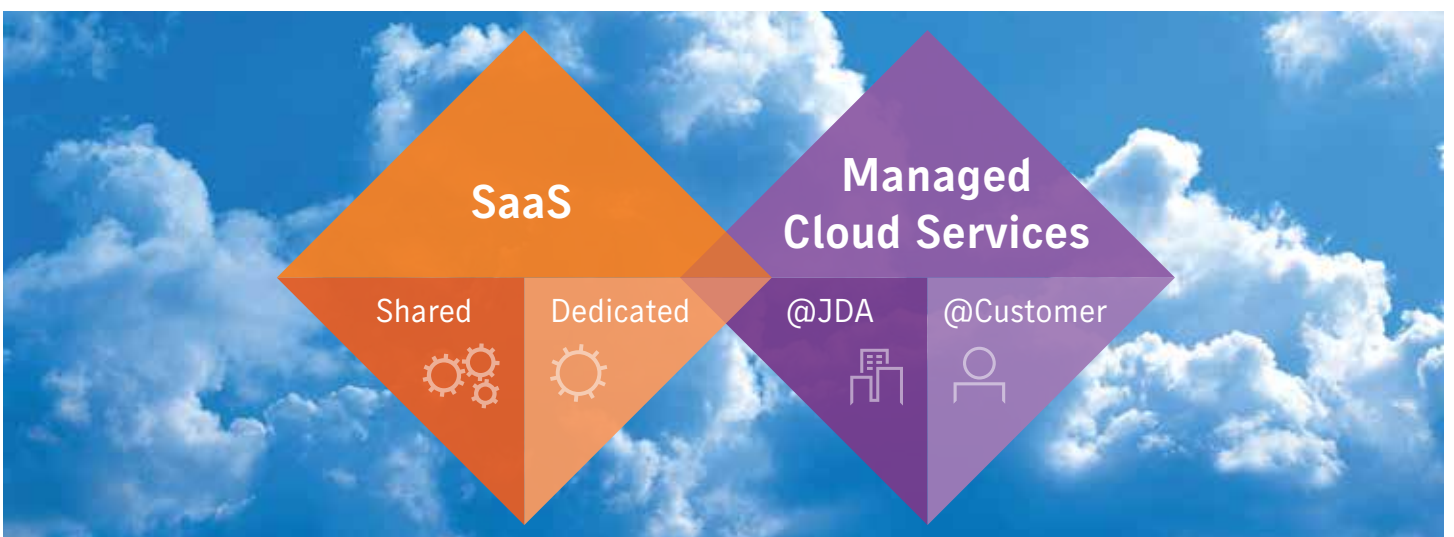

**#3**

### Faster Path to Innovation

- ◆ Access native integration to JDA's next-generation AI solutions for the cognitive supply chain
- ◆ Drive smarter, more agile supply chain transformations for greater results
- ◆ Connect intelligent data and insights using open API ecosystem leveraging AI, IoT, and Digital Edge

## JDA CLOUD: DEEP DOMAIN EXPERTISE & FLEXIBLE PLANS

## JDA OFFERS MULTIPLE CLOUD OPTIONS TO MEET YOUR NEEDS

### Shared SaaS

Subscription access to next-generation software applications, enhanced with AI, IoT and machine-learning capabilities, built and hosted on a cloud-native platform for faster and continuous innovation upgrades. The application is multi-tenant, but data is isolated for each client.

### Dedicated SaaS

Subscription access to industry-leading software applications in a single tenant code and data environment allowing some customization of configurations as well as more control of maintenance windows and upgrades than Shared SaaS.

### Managed Cloud Services @ JDA

Application management and hosting of JDA software where the client brings their own license.

### Managed Cloud Services @ Customer

Remote application management of JDA software that is hosted inside of a client's data center or at a partner's data center.

## WHEN YOU WANT THE BEST RESULTS, TRUST THE JDA CLOUD EXPERTS

 <b>500+</b> Cloud customers	 <b>500+</b> Cloud Services professionals	 <b>2M+</b> Users worldwide	 <b>7,500+</b> Systems managed	 <b>200,000+</b> Jobs executed per month
 <b>UP TO 99.95%</b> Uptime SLA	 <b>2,200+</b> Application instances	 <b>\$11B+</b> Freight under management	 <b>150M+</b> Shipments per year	 <b>1.3M+</b> Store layouts planned

**World-class cloud application & infrastructure security**

## JDA CAN HELP

Keep pace with ever-changing business needs – and achieve ROI in less time, with lower risk, and drive immediate value – by deploying your JDA solutions in the JDA Cloud.
